***Detailed Action***

The following is responsive to Applicant's amendment received Jan. 20, 2004.

Claims 1-47 are cancelled. No new claims are added. Claims 48-71 are currently pending.

The previous objection of claim 58 on page 2 of the office action mailed Nov. 19, 2003 is withdrawn in view of Applicant's amendment and the remarks contained therein.

Upon further consideration of the pending claims and specification, the following new ground of rejection is respectfully submitted.

The indication of allowability of claims 59-71 is withdrawn. Prosecution on the merits is reopened.

Claims 48-57 remain allowable over the prior art.

***New Ground(s) of Rejection***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 58-71 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The limitation "**high** concentration of glucosinolates and isothiocyanates" in these claims is a relative term which renders the claims indefinite. The expression "high concentration" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and thus one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

"The primary purpose of this requirement of definiteness of claim language is to ensure that the scope of the claims is clear so the public is informed of the boundaries of what constitutes infringement of the patent. A secondary purpose is to provide a clear measure of what applicants regard as the invention so that it can be determined whether the claimed invention meets all of the criteria for patentability and whether the specification meets the criteria of 35 USC 112, first paragraph with respect to the claimed invention." Please see MPEP 2173.

Because the limitation "high concentration" would invite subjective interpretations of whether or not a particular plant tissue was included by or excluded from the present claims, the Examiner respectfully submits that the public would not be informed of the boundaries of what constitutes infringement of the present claims and thus the claims do not meet the requirements of 35 USC 112, second paragraph.

### ***Conclusion***

Claims 58-71 are rejected.
